Work Experience

Peerfit *Junior Backend Software Engineer*

July. 2018 - Current

- Design asynchronous portal for our core API which allowed for us to integrate with third parties easier, allowing us to share important data with new business partners securely
- Created integration with Hubspot to allow marketing to identify users more specifically and create customized campaigns which increased our engagement
- Learned `dj-templar` in one month to redesign our Django app to take on a insurance company leading to increasing our business customer base by 5x and doubling our user base

BVZZ Design *Freelance Web Development*

Nov. 2017 - July 2018

- Created websites and APIs using React.js and Django in order to allow business to have web presence and create transactions through there websites
- Deployed servers with nginx, gunicorn, and systemd, keeping business costs down
- Created E-mail server with postfix and dovecot to interact with customers and used Rainloop to interface the mail server with coworkers

Cook Financial Group *Web Development*

Jan. 2017 - Nov. 2017

- Created SEC compliant websites which allowed us to direct potential customers to sign up forms leading to 200 new customers

- Automated marketing E-mails and backup processes using Python which saved 24 hours a month and allowed us to maintain record keeping compliance
-

Skills

Languages and Frameworks

- Python
